

Graham 3rd Party Interface

Have an existing controller and need an affordable electric drive upgrade solution? Look no further than the Graham 3rd Party Interface Product. This product features:

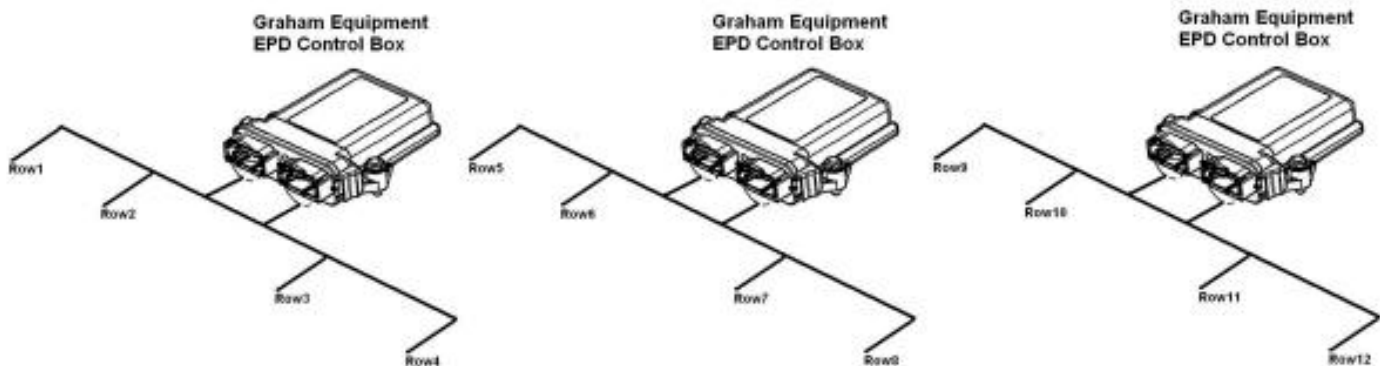

- Interfaces with all major 3rd Party Controllers
- Our 3rd party system takes commands from 3rd Party Controller using same signals that would be used for hydraulic motors and row clutches.
- Utilizes 80RPM Brushed Motors
- Harness connection between Graham Interface Board and 3rd Party Controller
- Wireless connectivity between Tractor and Planter
- Installs on any Meter and any major planter model
- Eliminate chains and sprockets

Population and Row Control signals are hard wired from the Rate Controller to the EPD Interface Box

Population and Row Control signals are sent via wireless link to each EPD Control Box from the EPD Interface Box
